ROHAN SWAMINATHAN

San Francisco, CA | 415-238-4062 | rohanswami@ucla.edu | LinkedIn | GitHub | Portfolio

EDUCATION

University of California, Los Angeles — Los Angeles, CA
Bachelor of Science, Mathematics of Computation — *Expected June 2028-2029 (accelerated)*

- Entered with 74 credits (out of 180 required for graduation) accrued through AP exams and Stanford coursework; on track to graduate in three years or less

Stanford University — Summer Quarter — Stanford, CA
Four undergraduate courses for full college credit — *June 2025 – August 2025*

- **GPA:** 4.11/4.0 — CS 193C: Client-Side Internet Technologies (A+), MS&E 20: Discrete Probability Concepts & Models (A), MUSIC 160S: Stanford Summer Symphony (A), CTL 53: Thriving Academically in College (P)

AI & SOFTWARE PROJECTS

CampCrew — AI Customer Support Agent — *Personal Project — Fall 2026*

- Built a customer support agent in Python on the Claude API that verifies customers, looks up orders, cancels orders, changes addresses, starts returns, or escalates to a human through 9 tools against a mock retail store
- Enforced the support policy in code as well as in the prompt, so a confused or manipulated model still cannot refund another customer's order, exceed refund limits, or skip identity verification
- Wrote a 25-scenario evaluation suite in which a second LLM role-plays customers (policy edge cases, escalations, social engineering, prompt injection), graded on final store state; fixed grader bugs, reaching 75/75 passing runs across 3 trials
- Built a FastAPI web demo with a live tool-call trace and per-session sandboxed store | live demo | GitHub | 2-minute video

CALICO Algorithmic Programming Competition (UC Berkeley) — *Team of 3 — Fall 2025 & Spring 2026*

- As the most experienced programmer, led a team in a global contest of algorithmically intensive math problems across 4 difficulty tiers; in Spring 2026 solved 7 of 20 problems and earned 2 Bronze Awards (Top 50% globally and pre-college), up from a mid-pack Fall 2025 debut

AI Avatar of Author and McKinsey Senior Partner — *Personal Project — Summer 2024*

- Inspired by Reid AI, I built an interactive AI replica of my father (author of Digital@Scale and McKinsey Senior Partner leading their GenAI platform) that answers spoken questions in his voice, likeness, and authentic point of view
- Architected the system across two AI platforms: trained an audio/video avatar on AI Studios from recorded footage and voice samples, then built a Botpress chatbot grounded in his book and interview transcripts; produced a demo video of an interview about my future in school and work

Web Apps & Algorithmic Computing — *Personal Projects — 2023 – Present*

- Built web apps from scratch in HTML/CSS/JavaScript, including a bidirectional graphing calculator that draws curves from equations and derives equations from clicked points, a Rubik's cube tutorial site, and a flashcard maker; built a Strava-to-Google Calendar sync using OAuth
- Solved 30+ Project Euler problems using number theory, combinatorics, dynamic programming, and optimization

TEACHING EXPERIENCE

Code Ninjas — San Francisco, CA
Code Sensei (Instructor) — *May 2026 – September 2026*

- Taught coding to 16–20 kids ages 5–11 through a Scratch-based curriculum; designed and led an original cybersecurity camp, plus week-long camps on Roblox and Scratch game design

Breakthrough Summerbridge — San Francisco, CA
Teaching Fellow — *August 2024 – March 2026*

- Designed and taught math, engineering, and writing lessons for 32 middle schoolers preparing for selective school admissions; helped multiple students earn offers from selective Bay Area schools

Mode to Code | Schoolhouse.world — San Francisco, CA / Remote
Web Development Instructor | Volunteer Math Tutor — *September 2023 – December 2025*

- Taught 4-week web development programs to students in San Francisco and remotely in India; led an 8-session SAT Math bootcamp as a certified Schoolhouse.world tutor

MUSIC

Swami 3 — San Francisco, CA
Co-Founder, Lead Songwriter & Web Manager — *2017 – Present*

- Co-founded an indie band with my two brothers; write all songs and build and run swami3.com; 1.4M+ YouTube subscribers and 300M+ views (with revenue generation on the platform); played Chase Center and headlined Case Western Reserve's bicentennial

SKILLS & ADDITIONAL INFORMATION

Programming: Python, JavaScript, HTML/CSS, Java, Git/GitHub
AI: Claude API (tool use, agent loops), LLM evaluation with simulated users, prompt-injection defenses, AI Studios, Botpress
SAT Score: 1550 (November 2024) - Math: 790, Verbal: 760
Languages: English (native); Mandarin and Spanish (both fluent)
Interests: Varsity tennis (league title 2026), classical and jazz piano, mathematics, basketball, skiing, speedrunning, Rubik's cubing
